ROSE EXHIBITORS PLEASE NOTE:

STEM COUNT is determined at the point of emergence of the stems from the top of the Society's containers, where the judge can see them, so be **VERY** careful when staging multi headed stems (where the number of stems is specified). Make sure the point where the lowest side shoot joins the main stem is **above** the **top** of the container. Also please remove foliage that would get jammed among the stems where they emerge from the container as this makes the count difficult for the judges.

NOTE THE FOLLOWING DEFINITIONS - ALL CLASSES

Stem - A stem is defined as a Rose which carries a single bloom or single bud

Cut - A cut is a stem that carries more than one bloom, and/or bud or buds.

Bud - A bud can show colour, but must not have any petals unfurled or separating from the centre, when petal unfurled, this is counted as a bloom.

Distinct - Means two different Cultivars; (differently named roses e.g. Moonstone, Tineke)

Blend - A rose which has more than one colour on its petals. May include a rose with two shades of the one colour. Any Rose listed in Modern Roses as 'Blend'.

NND - Means **Not Necessarily Distinct** (Not necessarily different). Three Roses **NND** could be two Moonstone and one City of Newcastle, or three Tineke. It allows for the mixing of roses with different names or roses of the same name in the one exhibit.
